

Supply chain business

Consulting

services

Overview.

"At AMCONSOF, supply chain expertise is a core component. "

We conduct a comprehensive supply chain business analysis that covers core company process analysis, the variety of used management tools, amount of fleet, the current software, and people.

Our experienced supply chain business consultant identifies essential areas for improvement.

Consulting areas we cover:

Digitalization of
warehouse processes

Manual planning &
routine algorithms

Spends optimization
on transport

Documentation flow
optimization

Department work
optimization

Digitalization of warehouse processes

What we do?

- Analyze, optimize, and implement the improvements to the delivery schedule
- Development and implementation of the manual transport planning algorithms.
- Apply TMS, WMS, FMS, etc to reduce cost, optimize management processes.
- Calculate the profitability of opening additional cross-docking sites

Result:

Reduction in the number of errors

Improving the accuracy of inventory control

Improving the warehouse performance without increasing costs

Manual planning & Routine algorithms

What we do?

Analyze your company's:

- Route planning
- Existed delivery models
- Idle vehicle runs
- Vehicle utilization
- The profitability of regional warehouses
- Transport turnover
- Level of logistics services
- Delivery windows
- Carrying capacity

Then help to reduce company costs by implementing manual scheduling and routing algorithms.

Result:

Reduction in the number of idle runs

Reduction of delivery times

Reduction of transport downtime

Increasing the level of transport service

Spends optimization on transport

What we do?

Analyze your company's:

- Methods of charging hired transport
- Freight terms, volumes, and cost
- The profitability of rate for each freight
- Access roads to loading points
- The efficiency and types of own and hired transport
- Drivers work schedule
- Carrier performance criteria
- Downtime of vehicles
- Current transportation types
- Product packaging

Then we suggest the optimal cost optimization route for your transportation company.

Result:

Shipping and logistics cost reduction

Documentation flow optimization

What we do?

Analyze and optimize the company's document flow:

Internal document flow:

- Reporting of the transport department
- Optimal timing of payments for transportation

Regulatory documents:

- Agreements with contractors
- Job descriptions
- Workflow process instructions

Result:

99.9%

Transparent accounting system

up to 20%

Reduction of operating costs

Department work optimization

What we do?

Analyze your company's transport department budgeting model including:

- Cost analysis
- Budget execution and implementation of changes
- The payroll of the transport department
- KPI and motivation model for employees
- Work schedule of drivers, forwarders, dispatchers, and others.
- Effectiveness of communication between departments

Result:

Reducing payroll costs while maintaining the same quality level

Employees satisfaction improvement

Value we brought for clients

○ Time

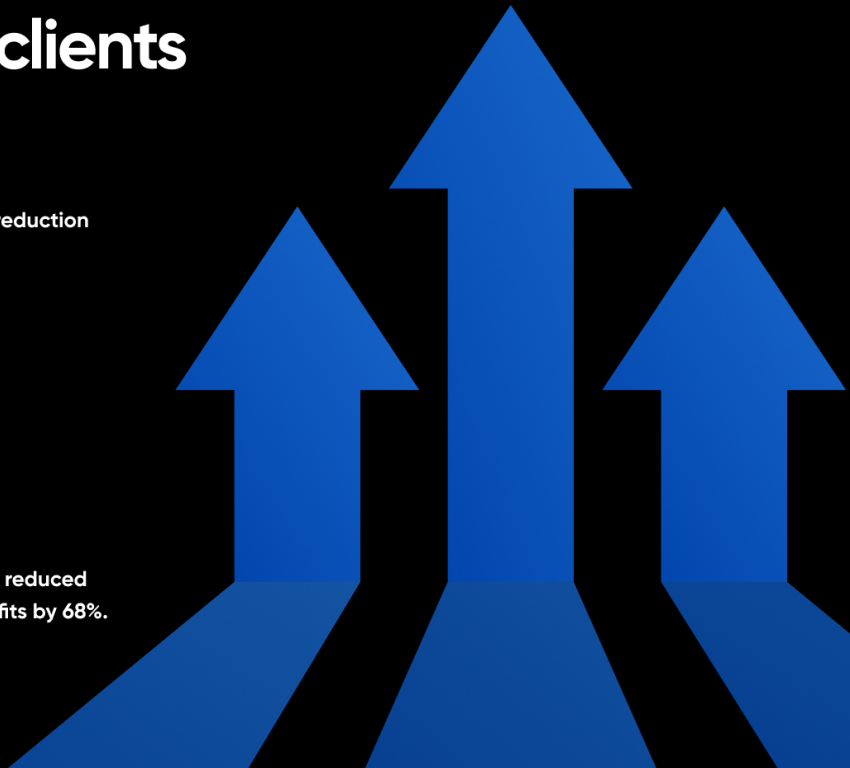

- Designed and implemented workflow that produced a **37% reduction** in time spends on manual work.

○ Money

- Increased acquisition values by **over 23%**
- Structured transactions with tax savings by more **than 30%**.

○ Operations

- Integrated operations of three separate business units which **reduced man-hours by 30%, grew revenues by 38% and increased profits by 68%**.
